CURRENT ACTIVITIES (Second Quarter 2013)

Staffing Plan
- The campus PMO has produced a staffing plan that identifies resources needed to carry out the scope of work identified in the local implementation plan.

Systemwide, Campus & Departmental Collaboration
- UCPath requires extensive planning and coordination at three levels: across the UC system, on our campus, and in individual departments. This is a major challenge for communications and business process standardization, but it’s also a great opportunity to realize efficiencies.

Business Process Team
- The local Business Process Team is analyzing the personnel processes (staff and academic) currently in place and expects to have this work completed by the end of July.
- The chairs of the team (Cindy Doherty, Tricia Hiemstra, and Maureen Evans) will compile findings and then pass them along to the Strategic Advisory Committee for review and implementation.

Active Workstreams
- Data Conversion: Populating the UCPath system with UCSB employee data.
- This workstream includes collecting non-PPS data, cleaning and validating the mapping of PPS data provided by the central UCPath PMO, writing scripts to test the data after the conversion, and obtaining campus sign-offs on the quality of the outcomes.

Interface Development: Sharing information between local applications and the UCPath Center.
- This workstream is dedicated to implementing optimal architectures for integrations between the UCPath Center and our local systems (such as the Data Warehouse, financial system, Kronos, etc...).
- As of July, 51 interfaces between our campus and the UCPath Center have been identified.

Communications: Ensuring the rapid flow of project communication throughout the campus.
- Due to the scope of UCPath, Kronos, and the financial system, and the unprecedented degree of operational change facing our campus, a robust, campus-wide communications network is critical.
- The UCPath Strategic Advisory Committee is currently identifying individuals in each department who will receive and distribute PMO communications, ensure that target audiences understand communications, escalate issues as needed, and participate in ongoing campus readiness surveys.

KEY ACCOMPLISHMENTS (Second Quarter 2013)
- The local UCPath Executive Sponsors approved a project governance plan. Current rosters are available on the UCPath Project Teams page on the PMO website.
- The local UCPath implementation plan has been written. Learn more about all the local UCPath workstreams on the UCPath Workstreams page on the PMO website.
- The local UCPath staffing plan has been written.
- The local communication readiness plan for all PMO projects has been written.
- The UCPath Strategic Advisory Group has been formed.
